

Cladophora sericea

Green algae

Threat Scores

1. Ecological Impact
 - This is a very robust species that can survive in a variety of conditions and stress levels; thrives in eutrophic conditions; during blooms, it invades whole ecosystems and smothers organisms beneath it
 - Piles of green algae producing foul odors on beaches are affecting tourism and resort businesses
2. Geographic Extent
 - Becomes Locally Pervasive during blooms
 - Locally patchy

Geography and Habitat

1. Native: Hawai'i
2. Introduced: Virginia, Alaska to California, Hawai'i (native transplant)
3. Habitats
 - Marine, estuaries/bays

Invasion Pathways

1. Hull/Surface fouling

Non-Native Locations

1. 41- Virginian
2. 54- Gulf of Alaska
3. 55- North American Pacific Fjordland
4. 56- Puget Trough/Georgia Basin
5. 57- OR, WA, Vancouver
6. 58- Northern California
7. 59- Southern California Bight
8. 152- Hawaiian Islands
